

IRIX[®] System Implementation

Comprehensive On-Site Implementation of Your IRIX-based System

Features

- On-site implementation of your IRIX system software
- Comprehensive selection of IRIX administrative services
- Knowledge transfer on basic system administration skills
- Documentation of the implementation process

Benefits

- Accelerate productivity: speeds system implementation
- Interactive, hands-on approach: helps you understand the technology quickly and easily
- A choice of topics: select the modules that best fit your needs and business objectives

A Service That Maximizes Your Productivity

The IRIX System Implementation service offers you comprehensive on-site system implementation for your IRIX-based system that delivers maximum results in minimum time. You dramatically save time while increasing the potential of your business operations.

Tailored to Fit Your Needs

We'll work closely with you to set up and configure your system software, focusing on the areas you deem most critical. You select the topics related to your business objectives and we'll concentrate on those areas. A list of suggested modules available to you includes the following:

- Basic configuration
- Software installation
- System administration and documentation
- Disk and tape management
- Serial device connectivity, configuring, and testing
- Backup and recovery management
- Print management
- Setup of client network services

Please note that network server setup is available with the IRIX Network Implementation service.

Knowledge Transfer Helps Maintain Your Product Investment

To ensure long-term success with your IRIX System Implementation, your SGI Managed Services representative will provide knowledge transfer on basic concepts and fundamental skills as well as discuss issues specific to your implementation. It's just another way SGI helps your staff gain the confidence needed to maintain and manage your product investment. The IRIX System Implementation service focuses on the installation and configuration of the IRIX OS. For information on IRIX system administration classes, contact SGI Customer Education.

SGI Managed Services

SGI Managed Services include a broad range of product-focused services to maximize system performance and accelerate productivity. Services include hardware installation, system deployment, implementation, and on-site and remote system management. Each service is delivered by an experienced SGI engineer.

SGI Technology Solutions

SGI Technology Solutions are empowering a world of innovation and discovery by providing top-performance systems, solutions, and services to the world's leading technical and creative users. With exceptional expertise in high-performance computing, advanced visualization, and the management of complex data, our specialists have the resources and skill sets to architect, implement, and support the most effective technology solutions for the 21st century.
