

Education Programs for Linux® Environments

Comprehensive Linux Training

Benefits

- Maximum utilization of Linux solutions: Master the skills required at each level of the organization, from system administration to executive-level management, to fully leverage the benefits of Linux throughout the company
- Practical knowledge transfer: Learn from the leading engineers who have contributed to the Linux open source community and implemented Linux solutions in real-world environments
- Customized learning: Satisfy unique education requirements with minimal time and resource investments
- One-stop training: The breadth of standard classes and the options for customized training make SGI Global Education the best choice for complete Linux training

Shorten the Learning Curve

SGI Global Education offers a comprehensive curriculum that can help a Linux workforce fully leverage the power of open source and maximize on-the-job productivity. SGI™ courses provide convenient, timely access to the latest Linux information and help customers implement strategies for raising overall Linux competency and innovation throughout a department or an entire enterprise.

Unmatched Quality of Instruction

A charter member and platinum sponsor of the Linux Professional Institute [LPI], SGI is uniquely qualified to teach an organization about the latest Linux implementations, tools, and solutions. SGI is a sponsoring member of Linux International and actively contributes to the Linux open source community, providing hardware and software technology as well as sponsorship of major Linux applications and suppliers. Members of the SGI Global Education team have published Linux reference texts and sit on the LPI Advisory Council.

Content and Delivery Options

SGI offers a standard curriculum of courses designed to improve skills for the novice as well as the seasoned Linux user. Choose from an extensive course catalog of introductory, intermediate, and advanced courses, including system and network administration; interoperability; security; and programming. Many of our courses contain the information needed to acquire LPI certification.

Courses are available at state-of-the-art SGI training centers located in most major business hubs in the world. Many SGI courses can also be delivered at customer sites, offering a cost-effective method for training larger groups. SGI Global Education also delivers customized program designs. A customized course starts with a thorough needs assessment and the definition of training goals, ensuring that final content addresses both the technical and the business requirements of the students.

For More Information

Please contact your local SGI sales office, call [800] 361-2621 [in the U.S. and Canada], or visit the SGI Web site—www.sgi.com/support—for additional information regarding the entire suite of SGI Global Education offerings.

Linux Service and Support Offerings

Consulting

- Linux clustering services
- Linux systems and technology coexistence/migration
- Linux business solutions

Managed Services

- Linux System Implementation
- Linux Network Server Implementation
- Linux Administration
- Linux System Tuning
- Linux/Windows NT® Interoperability Implementation
- Linux Cluster Implementation

Support Services

- 5-, 10-, and 20-incident CallPacks
- Mission-critical and enterprise support available
- Optional 7x24 support and same-day response
- Online support tools and information
- Worldwide support
- Parts repair and replacement on-site
- All major distributions supported on Intel® and MIPS® platforms

Global Education

Instructor-Led Courses

- Linux for Decision Makers [half day]
- Introduction to Linux®
- Linux/IRIX®/Windows NT Interoperability
- Linux System Administration®
- Linux System Administration II®
- Linux Network Administration®
- Linux Device Drivers and Kernel
- Linux Tools and Systems Programming
- Managing Linux Security
- Building Linux Beowulf Clusters
- C++ for Linux
- Java™ Programming for Linux

E-learning Courses

- Introduction to Linux®
- Linux System Administration I®
- Linux System Administration II®
- Linux Network Administration®

®Contain modules that meet the LPI Level I Objectives Preparation for a battery of LPI certification tests
