

## Emerging Technologies Practice

### Linux

- Advanced clustering environments
- Workflow and data management optimization
- Data migration and interoperability
- Infrastructure analysis and tuning
- Custom Linux training

### ASP

- ASP design
- ASP enabling
- Digital asset management

### Internet Consulting

- Web enabling
- Online HR
- E-mail serving

### Linux, ASP, and Internet Solutions

The Emerging Technologies Practice provides industry-focused solutions for Linux, ASP, and Internet customers. It delivers strategic solution initiatives on a global basis, captures and leverages valuable intellectual property created during engagements, and drives alignment between industry marketing groups and SGI Global Professional Services.

### Experience on the Cutting Edge

The SGI Emerging Technologies Practice has the resources and skills to deliver powerful, sustainable solutions that drive success. Our principals, solution architects, project managers, and technical consultants are not only highly skilled in multiple applications and technologies, but are also experienced across a broad range of target industries.

### Advanced Consulting and Integration Service Examples

#### SGI GenomeCluster™ Solution for Bioinformatics

SGI GenomeCluster™ is a powerful new Linux computing environment for life sciences research. This bioinformatics solution provides customers with an SGI-designed version of the popular BLAST gene searching application. SGI GenomeCluster is targeted for use with the new SGI I100L server and is cluster aware for the Linux environment. It is aimed at organizations processing large volumes of genomics sequences in commercial, academic and national research laboratories.

#### Electronic Design Automation Design Verification Cluster

The Emerging Technologies Practice provides workflow and integration services to minimize the time and resources required to migrate to Linux. This solution enables EDA customers to quick-start their migration to a Linux OS-based environment to capitalize on the price/performance benefits available from IA-32 Linux platforms.
