Experience High-Resolution, Large-Format Display for Maximum Visualization

The SGI Reality Center Insight high-resolution display makes collaborative visualization more accessible and affordable than ever before. High-quality graphics imagery, video, presentation slides, and other media sources can be viewed by small collaborative groups to speed decision making, streamline work flow, and enable data to be viewed in a manner that captures imagination and insight.

SGI Reality Center Insight features:

- Freestanding display for zero-facility impact and quick installation
- High-resolution, shadow-free viewing area
- A design that works in conference rooms, classrooms, trade shows, laboratories, and public spaces
- Modular components that scale easily to meet your future needs
- Comprehensive support direct from SGI; installation and one-year warranty included

Contact your SGI representative for more information on the Reality Center Insight promotion.
