

## SGI® Co-Investment

### Additional Investments for Science, Engineering, and Media Research

#### Specially Developed for Research Institutions and Principal Investigators

SGI provides hardware, services, and software in support of scientific, engineering, and media researchers worldwide. Educational institutions are eligible for substantial discounts through the EduCare program. In recognition of significant investments, SGI provides incremental co-investment dollars to demonstrate a commitment to significant research activities and to enhance the capacity of the solution to advance the research project and/or to maximize the funding available from federal, state, provincial, and/or private funding institutions.

#### What is Co-investment

An SGI co-investment represents a dollar value to the principal investigator or institution. The co-investment is provided in addition to EduCare discounts. It is a valuable contribution, beyond the superior technical and price-performance benefits of SGI® hardware and software. Researchers at degree-granting institutions have greater flexibility in positioning an SGI co-investment. For example, co-investment can be used to get matching funds, or to demonstrate industry investment in research.

The SGI co-investment helps principal investigators compete for more funding, which strengthens the competitive value proposition to the funding organization of grant applications. Co-investment provides more value to degree-granting institutions than traditional pricing programs alone.

#### Samples of SGI Investments in Research

- Integration of AccessGrid with OpenGL Vizserver™
- Porting and/or optimization of key science, engineering or media applications
- Basic research in emerging disciplines
- Research done on key national defense and intelligence programs
- Development of key technologies to advance SGI platforms in HPC, visualization and data management

#### SGI Commitment to Innovation and Discovery

For nearly two decades, SGI has set the pace for high-performance computing, visualization and data management. A long history of technological leadership and expertise, combined with far-reaching industry alliances, makes SGI uniquely qualified to deliver integrated solutions that create new standards for research, effectiveness and convenience. SGI co-investments demonstrate SGI's unmatched commitment to customer success.

#### Co-investment requirements

SGI co-investments are available to U.S. and Canadian degree-granting institutions that develop creative projects and partnerships addressing national or private-sector investment priorities. SGI is interested in publicizing leading research and expects co-investment recipients to participate in promotional activities such as press releases, white papers, success stories. Co-investments are issued quarterly and can only be applied to SGI hardware and software products, not to customer support, managed services, or professional services. All co-investments will be reviewed, supported, and approved by your local sales management team.

#### For More Information

For additional information about SGI Co-Investment or EduCare, contact your SGI or James River Technical account representative or call (866) 744-2275.
