

Let Altix® Turbocharge Your Database

To take advantage of these special deals or to find out more about how you can turbocharge your database processing with an Altix server, call 1-800-SGI1 (7441), e-mail us at eleads@sgi.com or contact your regional SGI channel partner.

SGI® Altix® Brings the Power of High Performance Computing to Database Applications

SGI knows about data. Whether crunching it, storing it or visualizing it, SGI systems have always excelled at helping people turn mountains of data into knowledge and competitive advantage. So it makes sense that SGI systems are among the worlds' best for running the database software that companies use to manage, access, and analyze data. SGI® Altix® excels at solving demanding database challenges, with industry-leading performance, scalability, and return-on-investment.

Fastest Time-to-Insight for data warehousing and analytics applications so critical business decisions can be made in real time rather than offline.

Proven and reliable, backed by SGI's 20+ years of experience in solving the world's most challenging compute problems.

Flexible, open-standards-based platform that lets you run IBM® DB2®, Oracle®, and most other databases on standard Linux® using the power of industry-leading Intel Itanium® 2 processors.

And now, you can bring the power of High Performance Computing to your database applications with a powerful 4-processor SGI® Altix® 330 for as little as \$18,613.

Sample Configurations

	US Prices*
4P Altix 330, 1.5 GHz/ 4MB L3 cache, 16 GB memory	\$18,613
