

# f1200 x86 Workgroup Server

## Ease of Use, Flexibility and Scalability

Turnkey Solution for Demanding ANSYS Jobs.

The f1200 x86 workgroup server from SGI is a high-performance shared-memory server for power users and workgroups to run demanding ANSYS mechanical simulations.

Targeted at workgroup environments with a need for performance and scalability beyond today's workstations, the f1200 offers high processor count and large memory to process larger models in less time. The f1200 turnkey solution provides out-of-the-box value with the Linux® operating system pre-configured to run multiple jobs simultaneously or a single large one on the entire system.

Add your own f1200 server single box configuration with up to 12 next-generation Intel® Xeon® processors (dual-core or quad-core), and up to 192GB RAM. For a limited time, get one of these bundles at a special price:

**Entry-level f1200:** 8x Intel Xeon (dual-core) LV 5148 (2.33GHz/4MB) processor, 48GB RAM, 4x 150GB 10K RPM SATA HDD  
**\$58,500 [USD]**

**High-end f1200:** 12x Intel Xeon (quad-core) 5345 (2.33GHz/4MB) processor, 96GB RAM, 6x 150GB 10K RPM SATA HDD  
**\$89,000 [USD]**

And you get...

- The powerful combination of Intel Xeon dual-core or quad-core processors, the Linux OS (Novell® SUSE® LINUX Enterprise Server) and ScaleMP™ versatile SMP (vSMP) shared-memory architecture
- A turnkey system that can be deployed with minimal IT infrastructure in place
- 3 Year advanced exchange hardware warranty from SGI, 1 Year SUSE support
- Investment protection with a system that can accommodate future growth: up to 24 sockets (96 cores) and up to 384GB of shared memory under one instance of Linux

Don't miss out on this special pricing...
