

CSC[®] and SGI[®] Next Generation Workshop and White Board Session

Knowledge-sharing on Data Center Technology,
Operations and Infrastructure.

The future of Enterprise Solutions is being defined. Be a part of it.

In today's world, most of the companies face challenges like:

- How to make their IT infrastructure more dynamic and flexible than ever before to support their business growth and its changing dynamics?
- How to become more environmentally responsible and to be compliant with new Green regulations imposed by government and industry bodies?
- How to make IT infrastructure more efficient and effective?
- How to maximize returns invested on IT infrastructure?
- How to handle the increasing security threats, risks and regulatory compliance and secure their IT infrastructure?
- How to align IT infrastructure to services effectively?

Would you like to experience a Next Generation Data Center today?

Need a forum to discuss:

- **Next-generation data center capabilities**, including data center consolidation; server consolidation and rationalization; storage transformation; test- and development-environment transformation; service desk optimization; and "Green Computing" for optimizing data-center performance while reducing power consumption;
- **A series of enterprise network offerings** that leverages CSC's and SGI's expertise in designing and building converged data and voice systems, including Internet protocol-based networks, which address the mobility demands of today's workforce by enabling anytime, anywhere access to corporate information, databases, e-mail and applications;
- **Highly specialized IT infrastructure and application security capabilities** focused on helping organizations decrease risk, reduce costs, maintain business continuity, improve productivity and allow secure interaction with employees, business partners and customers through effective identity and access management; and
- **Next-generation workplace capabilities** to help deploy IT to automate common workplace activities, including a solution that redefines the workplace as being wherever the employee needs or wants to work, and from any device, anywhere, anytime.

This half-day **Next Generation Data Center Workshop** is packed with an in-depth Technical Deep Dive of the latest technology and infrastructure solutions.

To arrange a Next Generation Data Center Workshop with CSC and SGI experts at your site, contact:
